

Attorney Docket No. 128.1045PAT 31-Aug-07

In the Specification:

Please add the following paragraph to page 1, line 2 below the title:

5     --PRIOR APPLICATION

        This application is a U.S. national phase application based on and claiming priority from Swedish Patent Application No. C302076-5 filed 14 July 2003.--

10             Please amend paragraph [0001] of the corresponding US Patent Application No. 2005/0011969, as shown below:

        The present invention concerns an arrangement for the axial feed of a supply hose. ~~of the type described in the introduction to claim 1.~~  
15

        Please amend paragraph [0014], as shown below:

~~The principal aim~~ One object of the present invention is to  
20     achieve an arrangement adapted for continuous forwards and backwards driving of a supply hose, which arrangement wholly or partially solves the disadvantages and problems described above. ~~This is achieved according to the invention through an arrangement that displays the features specified in claim 1.~~  
25     Wear of the supply hose that arises when using previously known solutions can be significantly reduced in accordance with the invention.
